Subject Index

Active transport 167
Aminimides
  extraction of heavy metal cations 73
Anion receptors 203
Azacrowns
  sugar containing 195

Calix[6]arenes
  complexes with
    charge transfer complexes 53
Calix[4]crowns 305
Chiral induction 137
Chromogenic chelating agents 137
Chromoionophores 147
Clinoptilolite 157
14-Crown-4
  complex with water 85
18-Crown-6
  complex with
    3,4-diaminofurazane 181
Crown ethers
  charge transfer complexes 175
Crownophane 329
Cryptands
  2-methylenepropylene bridged 223
Cyclodextrin accelerated oxidation 245
Cyclodextrin – *alpha*
  complex with
    α-lipoic acid 119
Cyclodextrin – *beta*
  alkyl capped carbonates 269
  as pendant group 289
  complexes with
    acaricides 35
    aromatic ketones 137
    α-lipoic acid 119
    sulfafurazole 277
    terpenes 11
  formation of radicals 99

Cyclodextrin – *dimethyl beta*
  complex with
    naphthalene (metastable) 65
Cyclodextrin – *methyl beta*
  complexes with
    L-alanine-β-naphthylamide 127
    8-chlorowarfarin 259
    warfarin 259
Cyclophane – three bridged 329

Diol host 313
Ditopic receptor 305

EPR spectroscopy 99

Hofmann type clathrates
  IR and Raman spectra 1

Intercalates of
  γ-zirconium phosphate 213
IR spectra 1

Liquid membranes 167

Polarography 41
Polymer supported β-cyclodextrin 289

Raman spectra 1

Semiempirical computations 203

Ultrafiltration 127
Urea-anion host lattices 233

Werner type clathrates 23

γ-Zirconium phosphate
  porphyrin intercalate 213
